PHASE 1 - GENESIS OF ORCS

Farming - Genesis Orcs are the only beings in existence to produce ZUG, the Utility Token of Ether Orcs. Orcs with no items produce 4 ZUG per day.

What is ZUG? ZUG is a ECR-20 Token which can be traded on a DEX such as Sushiswap and Uniswap. The community also uses Sudoswap to trade ZUG

What is ZUG used for? In Phase 1, ZUG was used to mint the Genesis Orcs, all Orcs have been minted to date. ZUG is also used for secret loot pools. The uses for ZUG has increased as now will be heavily needed for Phase 2. Only Genesis Orcs can farm ZUG.

Can I still Mint orcs? Mint is completed. However there will be a new collection where ZUG will be needed to mint.

What kind of Orc should I buy? Whatever you feel is a fair price. There is value in all levels of Genesis Orcs and will be needed for Phase 2.

What makes Ether Orcs special? Ether Orcs is the 1st 100% onchain RPG NFT game that does not use APIs or IPFS. Every single Genesis Orcs and the actions it takes lives on the Blockchain forever

How is the game played? There is a community built GUI but most users will use the Etherscan contract to create actions for their orcs. We plan on developing a more robust GUI in the future.

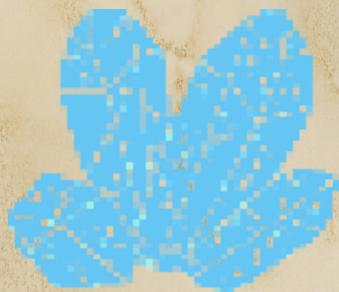

Am I too late? Short answer is no, like any other games, there will always be people ahead of you and behind you. There will be value in ALL Genesis Orcs, not matter the level, color, ZUG modifier etc.
